

Features
The nest level of the loop.
The number of dynamic operations in the loop body.
The number of floating point operations in the loop body.
The number of branch operations in the loop body.
The number of memory operations the the loop body.
The number of load operations the the loop body.
The number of store operations the the loop body.
The number of implicit instructions the the loop body.
The number of operands in the loop body.
The number of unique predicates in the loop body.
The number of calls to the loop
The number of definitions in the loop body
The number of uses in the loop body
The number of array element reuses in the loop body
The minimum tripcount of the loop (-1 if unknown)
